

PAID MEDIA INTELLIGENCE

Every marketing platform tells a different story.
We tell you which one is true.

One intelligence layer for your paid media, unifying every platform, report, and dashboard your team touches. Run it with **your team, armed**, or hand it to **our senior buyers**.

Because advice should never depend on how much you spend.

ONE FLAT MONTHLY FEE / \$0 MANAGEMENT FEES / \$0 MARKUPS

TRUSTED WITH MEDIA FOR

120% sales growth in 60 days

340% return on Q1 ad spend

92% less time on reporting

Full case studies below.

More spend ≠ faster decisions.

If any of these sound familiar, you already know why growth stalled.

Spend first, learn later.

Most brands buy the lesson after the budget is gone. The report arrives; the money already left.

Platforms grade their own homework.

Every ad platform's recommendations optimize for its own revenue. Of course Google says spend more on Google.

Data sits in silos.

Sales in one system, media in five others, and attribution stitched together in a spreadsheet nobody fully trusts.

Reporting eats the week.

Hours assembling numbers that still don't answer the only question that matters: what do we scale?

None of this is a spending problem. It's a decision problem, and decisions need intelligence.

SEE THE DIFFERENCE

Same prompt. Two different answers.

Already tried doing this with a chatbot? So have your competitors. Here's the same question, asked of a generic AI and asked of DISTRIKT.

ChatGPT

How did my paid media perform last month?

Thought for 10s...

I don't actually have your paid media results for last month available in this chat or in my retained context.

If you were expecting me to remember a report we reviewed previously, I no longer have those metrics.

If you can confirm or paste any of the following I'll give you a full executive analysis—not just the numbers, but what changed, why it may happened, and what to do next:

- Platform (e.g. Google Ads, Meta, LinkedIn)
- Campaign
- Measurement
- Dates
- CPE
- Conversions / Leads
- ROAS / CPA
- Revenue / Payout (if applicable)

Or simply export the monthly report from your dashboard (CSV, PDF, or screenshot), and I'll summarize.

- Breakdown by campaign (20 parameters)
- View
- Where it came from

+ Ask anything...

No access to your accounts. It asks you for the numbers, then summarizes what you already knew. The homework is still yours.

DISTRIKT

How did my paid media perform last month?

I've analyzed the performance of all paid media channels for the last available month (June 2025).

Here is a summary of the key metrics:

- Total Ad Spend: \$112.1k
- Total Revenue from Ads: \$117,743.9k
- Return on Ad Spend (ROAS): 474%
- Impressions: 24,685
- Clicks: 1,143
- Click Through Rate (CTR): 10%
- Cost Per Click (CPC): \$11.12

In summary, for every dollar spent on advertising to date, **AMC Company** generated \$4.74 in return from attributed sales.

Would you like to see a breakdown of this performance by advertising platform (e.g. Meta, Google, Amazon)?

+ Ask anything...

Plugged into your accounts. It answers with your numbers: spend, ROAS, attribution, and what to do next.

Other tools guess. DISTRIKT knows.

Every channel.
One system.
One answer.

What's working. What's not.
What to scale. What to cut.

In seconds.

THE INTELLIGENCE LAYER

All of your marketing data flows through KNAVRT

Spend, creative results, and conversion data live in one intelligence layer instead of scattered dashboards. KNAVRT spots what is working, what is drifting, and where the next dollar should go. You walk into Monday's meeting with the answer.

THE HUMAN LAYER

People execute every optimization by hand

Whether that's your team acting on what KNAVRT surfaces, or our senior buyers running it end to end, every change is made deliberately and logged: bids, budgets, audiences, creative. You always know what changed, when, and why. **And your in-house team stays the heroes: KNAVRT makes them the best-armed people in the building.**

Your data is a mess? Good.

If your data were clean, you wouldn't need us. Untangling it is day one of the engagement, not a prerequisite. We have never met clean data.

WHERE YOU ARE WHERE YOU NEED TO BE

Paid media is the entry point. Not the ceiling.

Most brands are stuck in the first box. **And they're paying for it like it's a privilege.**

The bottleneck is not your budget. It is where your intelligence lives.

THE HONEST ECONOMICS

Same budget. More machine.

Every dollar buys ads. Every result buys intelligence.

\$0	\$0	1	100%
Management fee on your media	Markup on CPMs or platform costs	Flat monthly KNAVRT fee, scoped to your account	Of your ad spend goes to buying ads

Here's the honest math. A quality agency will charge a meaningful percentage of your spend for execution and hand you a black box. DISTRIKT's flat KNAVRT fee often lands in a similar range at smaller budgets. **You don't necessarily pay less to work with us. You get radically more for the same line item:** execution, plus the intelligence layer that tells you what to scale, plus accounts you own and can audit any day. Your ad spend goes straight to the platforms. Setup is waived, the engagement runs on a simple 3-month minimum, and your flat fee is quoted before you commit.

The old model has a name. It is called *arbitrage*.

In the media buying industry, arbitrage means trading against your client's budget: they buy your media low, bill you high, and pocket the spread. It is rarely disclosed and never itemized. Some agencies do it through marked-up CPMs, some through opaque fees, some through both. You cannot audit what you cannot see. Our answer is structural: we take no margin on media at all, so there is nothing to hide and nothing to audit.

THE DISTRIKT DISCIPLINE

Why DISTRIKT?

Budget follows evidence and data. Not opinion.

Because our incentives are actually aligned with yours. Most agencies get paid a percentage of what you spend, which means every honest test result that says "spend less here" costs them money. We don't take a cut of media at all. **No management fee and no CPM markup.** KNAVRT is one flat fee regardless of your ad budget and monthly spending.

That single structural difference is what makes the rest possible. It allows us to scale or shift your budget toward whatever the data says is working, because we have nothing to lose when the truth points away from a certain media type or from spending more.

Our KNAVRT fee is honest by construction, not by promise.

RESULTS FROM REAL DEPLOYMENTS

Real data. Real results.

HOME WARRANTY PROVIDER		NUTRACEUTICAL BRAND	
Couldn't identify where to put budget. Performance signals were unclear. Media spend was misaligned.		Drowning in data across Amazon, Shopify, multiple ad platforms. Teams reported for hours. Growth stalled.	
60 Days	120%	Sales Growth	32%
	\$500K+	New Monthly Revenue	340%
	84%	Increase in Ad Efficiency	92%
*Client investment recovered within the first month. Still active.		*Client investment recovered within three months of deployment.	

Stop guessing. Start scaling.

You show us what you spend and where.

We show you what's working, what's bleeding, and what we'd scale first.

You leave with your flat KNAVRT fee. **No obligation.**

Worst case, you walk away knowing exactly what your media should cost.
